Child pornography

Child pornography

>Child pornography is sexual abuse material.
>Defining child sexual abuse material.
>Child sexual abuse material (legally known as child pornography) refers to any content that depicts sexually explicit activities involving a child. Visual depictions include photographs, videos, digital or computer generated images indistinguishable from an actual minor. These images and videos that involve the documentation of an actual crime scene are then circulated for personal consumption. More recently, live-streaming sexual abuse has begun to surface. In these instances individuals pay to watch the live abuse of a child via a video streaming service. This type of abuse is incredibly difficult to detect, due to its real-time nature and the lack of digital evidence left behind following the crime.
>Though child sexual abuse material (CSAM) is a global issue, the United States remains one of the largest producers and consumers of child abuse content in the world. It's important to understand the true nature and pervasiveness of child sexual abuse material to convey the urgent need to address this crime.
>REDEFINING "CHILD PORNOGRAPHY"
>While "child pornography" remains the legal term for this material, the subject matter is one of the most violent, horrific forms of child abuse possible. For this reason, those working to combat this type of abuse have begun using the term "child sexual abuse material" (CSAM), which more accurately conveys the content and is explicitly tied to the source of the problem.

Child prostitution

>Child prostitution

>Child prostitution is prostitution involving a child, and it is a form of commercial sexual exploitation of children. The term normally refers to prostitution of a minor, or person under the legal age of consent. In most jurisdictions, child prostitution is illegal as part of general prohibition on prostitution.

>Child prostitution usually manifests in the form of sex trafficking, in which a child is kidnapped or tricked into becoming involved in the sex trade, or survival sex, in which the child engages in sexual activities to procure basic essentials such as food and shelter. Prostitution of children is commonly associated with child pornography, and they often overlap. Some people travel to foreign countries to engage in child sex tourism. Research suggests that there may be as many as 10 million children involved in prostitution worldwide.[1] The practice is most widespread in South America and Asia, but prostitution of children exists globally,[2] in undeveloped countries as well as developed.[3] Most of the children involved with prostitution are girls, despite an increase in the number of young boys in the trade.

>All member countries of the United Nations have committed to prohibiting child prostitution, either under the Convention on the Rights of the Child or the Optional Protocol on the Sale of Children, Child Prostitution and Child Pornography. Various campaigns and organizations have been created to try to stop the practice.

>American Mafia - Wikipedia

>The American Mafia,[3][4][5] commonly referred to in North America as the Italian-American Mafia, the Mafia, or the Mob,[3][4][5] is a highly organized Italian-American criminal society and organized crime group. The organization is often referred to by its members as Cosa Nostra (Italian pronunciation: [ˈkoːza ˈnoːstra, ˈkoːsa -], "our thing" or "this thing of ours") and by the American government as La Cosa Nostra (LCN). The organization's name is derived from the original Mafia or Cosa nostra, the Sicilian Mafia, with "American Mafia" originally referring simply to Mafia (or Cosa nostra) groups from Sicily operating in America, as the organization initially emerged as an American offshoot of the Sicilian Mafia (known as Cosa nostra by its members). However, the organization gradually evolved into a separate entity partially independent of the original Mafia in Sicily, and it eventually encompassed or absorbed other Italian-American gangsters and Italian-American crime groups (such as the American Camorra) active in the United States and Canada that were not of Sicilian origin. In North America, it is often colloquially referred to as the Italian Mafia or Italian Mob, though these terms may also apply to the separate yet related Sicilian Mafia or other organized crime groups in Italy or ethnic Italian crime groups in other countries.

(omit)

>The most important unit of the American Mafia is that of a "family," as the various criminal organizations that make up the Mafia are known.

Despite the name of "family" to describe the various units, they are not familial groupings.[7]

(omit)

>Structure

>The American Mafia operates on a strict hierarchical structure. While similar to its Sicilian origins, the American Mafia's modern organizational structure was created by Salvatore Maranzano in 1931. He created the Five Families, each of which would have a boss, underboss, capos, soldiers—all only full-blooded Italian Americans—while associates could come from any background.[62][63][20] All inducted members of the Mafia are called "made" men. This signifies that they are untouchable in the criminal underworld and any harm brought to them will be met with retaliation. With the exception of associates, all mobsters are "made" official members of a crime family. The three highest positions make up the administration. Below the administration, there are factions each headed by a caporegime (captain), who lead a crew of soldiers and associates. They report to the administration and can be seen as equivalent to managers in a business. When a boss makes a decision, he rarely issues orders directly to workers who would carry it out but instead passes instructions down through the chain of command. This way, the higher levels of the organization are insulated from law enforcement attention if the lower level members who actually commit the crime should be captured or investigated, providing plausible deniability.

>There are occasionally other positions in the family leadership. Frequently, ruling panels have been set up when a boss goes to jail to divide the responsibility of the family (these usually consist of three or five members). This also helps divert police attention from any one member. The family messenger and street boss were positions created by former Genovese family leader Vincent Gigante.

I'm thinking, "Isn't it divided by tribe or class?"
Sunnyawachi "class system" ♪

Class system

>Social class
>A social class is a set of concepts in the social sciences and political theory centered on models of social stratification which occur in a class society, in which people are grouped into a set of hierarchical social categories.[1] the most common being the upper, middle and lower classes. Membership in a social class can for example be dependent on education, wealth, occupation, income, and belonging to a particular subculture or social network.[2]
>"Class" is a subject of analysis for sociologists, political scientists, anthropologists and social historians. The term has a wide range of sometimes conflicting meanings, and there is no broad consensus on a definition of "class". Some people argue that due to social mobility, class boundaries do not exist. In common parlance, the term "social class" is usually synonymous with "socio-economic class", defined as "people having the same social, economic, cultural, political or educational status", e.g., "the working class"; "an emerging professional class".[3] However, academics distinguish social class and socioeconomic status, using the former to refer to one's relatively stable sociocultural background and the latter to refer to one's current social and economic situation which is consequently more changeable over time.[4]
>The precise measurements of what determines social class in society have varied over time. Karl Marx thought "class" was defined by one's relationship to the means of production (their relations of production). His understanding of classes in modern capitalist society is that the proletariat work but do not own the means of production, and the bourgeoisie, those who invest and live off the surplus generated by the proletariat's operation of the means of production, do not work at all. This contrasts with the view of the sociologist Max Weber, who argued "class" is determined by economic position, in contrast to "social status" or "Stand" which is determined by social prestige rather than simply just relations of production.[5] The term "class" is etymologically derived from the Latin classis, which was used by census takers to categorize citizens by wealth in order to determine military service obligations.[6]
>In the late 18th century, the term "class" began to replace classifications such as estates, rank and orders as the primary means of organizing society into hierarchical divisions. This corresponded to a general decrease in significance ascribed to hereditary characteristics and increase in the significance of wealth and income as indicators of position in the social hierarchy.[7][8]
