>Spotlight (2015) - IMDb

>Spotlight (film)  
>Spotlight is a 2015 American biographical drama film directed by Tom McCarthy and written by McCarthy and Josh Singer.[4][5] The film follows The Boston Globe's "Spotlight" team, the oldest continuously operating newspaper investigative journalist unit in the United States,[6] and its investigation into cases of widespread and systemic child sex abuse in the Boston area by numerous Roman Catholic priests. Although the plot was original, it is loosely based on a series of stories by the Spotlight team that earned The Globe the 2003 Pulitzer Prize for Public Service.[7] The film features an ensemble cast including Mark Ruffalo, Michael Keaton, Rachel McAdams, John Slattery, and Stanley Tucci, with Brian d'Arcy James, Liev Schreiber, and Billy Crudup in supporting roles.[8]  
>Spotlight was shown in the Out of Competition section of the 72nd Venice International Film Festival,[9] the Telluride Film Festival and the Special Presentations section of the 2015 Toronto International Film Festival.[10] It was released on November 6, 2015, by Open Road Films and grossed \$98 million worldwide.[3] It received widespread critical praise, with critics lauding the performances of the cast, historical accuracy and screenplay; it won numerous guilds' and critics' association awards, and was named one of the best films of 2015 by various publications. Spotlight won the Academy Award for Best Picture, along with Best Original Screenplay, from six total nominations, making it the first Best Picture winner since The Greatest Show on Earth (1952) to win only one other Oscar. The film also won the Screen Actors Guild Award for Outstanding Performance by a Cast in a Motion Picture.

Human beings to express the secondary sexual characteristics in children age of around 10 years of age♥ (▽▽)b

>Secondary sex characteristic

>Secondary sex characteristics are features that appear during puberty in humans, and at sexual maturity in other animals.[1][2] These characteristics are particularly evident in the sexually dimorphic phenotypic traits that distinguish the sexes of a species,[3] but unlike the sex organs (primary sex characteristics), are not directly part of the reproductive system.[4] Secondary sex characteristics are believed to be the product of sexual selection for traits which display fitness, giving an organism an advantage over its rivals in courtship and in aggressive interactions.[5]

>Secondary sex characteristics include, for example, the manes of male lions,[2] the bright facial and rump coloration of male mandrills, and horns in many goats and antelopes. These characteristics are believed to be produced by a positive feedback loop known as the Fisherian runaway produced by the secondary characteristic in one sex and the desire for that characteristic in the other sex. Male birds and fish of many species have brighter coloration or other external ornaments. Differences in size between sexes are also considered secondary sexual characteristics.

>In humans, visible secondary sex characteristics include enlarged breasts and widened hips of females, facial hair and Adam's apples on males, and pubic hair on both.[4][6]

[https://en.wikipedia.org/wiki/Secondary\\_sex\\_characteristic](https://en.wikipedia.org/wiki/Secondary_sex_characteristic)

>Secondary sex characteristic - Wikipedia

>secondary sexual characteristics

>Secondary sex characteristics are biological sex differences throughout the body . Sexual dimorphism is a phenomenon in which males and females differ in morphology during the process of sexual maturation, and is found in many organisms. In humans , at first , external sex differences are seen only in primary sex characteristics , and at the Tanner stage male genitalia (male), breasts (female), pubic hair (both males and females) appear, and they do not have fertility , but after that As they develop and mature, they develop secondary sex characteristics and become fertile. Puberty is the period during which secondary sex characteristics begin to appear and the body changes from that of a child to that of an adult . This section mainly describes the human body.

(omit)

>development

>For both men and women, there are individual differences in the timing, order, appearance, and development of secondary sex characteristics.

>The onset of secondary sex characteristics is about 1 year and 9 months earlier in females.

>On average, the onset of secondary sex characteristics is 11 years and 6 months for boys and 9 years and 9 months for girls [Note 1] .

>Depending on individual differences, there is a difference of about a year and a half, and depending on the month of birth, there is a difference of about half a year. Premature children born in April are in the first half of 2nd grade, and boys born in March are at the end of 1st grade. \* Obese children tend to grow up early, and although they are large when they are young, their final height tends to be small [3] .

>Secondary sex characteristics first appear in men during male genital development (male genital Tanner stage II), and in women during breast development (Thelarche, the first half of breast Tanner stage II → nipple stage [4] [5] ). be. See the section on puberty for the specific order of appearance of secondary sex characteristics by gender . Hairy boys tend to have pubic hair earlier.

> 第二性徴

> 第二性徴(だいにじせいちょう、英: Secondary sex characteristic)は、体全体での生物学的性差である。性的に成熟する過程で雌雄の形態の差を生じる現象は性的二形といわれ、多くの生物に見られる。ヒトにおいては、当初は第一性徴のみの外形的性差が見られ、タナー段階では男性器(男性)・乳房(女性)・陰毛(男女とも)が現れ、生殖能力は持たないが、それ以降はその発達成熟に伴って第二性徴が発現し、生殖能力を持つようになる。第二性徴の発現が始まり、子供から大人の身体に変化している期間を思春期と呼ぶ。本項では主にヒトの体について記述する。

(略)

> 発育

> 男女とも第二性徴が発現する時期、順序、見た目、発達具合などには個人差がある。

> 第二性徴の始まる時期は、女子の方が1年9ヵ月程早い。

> 第二性徴の発現が始まるのは、平均して男子が11歳6か月、女子が9歳9か月[注 1]である。

> 個人差により前後1年半・誕生月により前後半年の差があり、4月生まれの早熟女子は小2前半・3月生まれの晩熟男子は中1終わりとなる。

※肥満の子は早くなる傾向にあり、小さい頃は太柄だが、最終身長は小さくなる傾向がある[3]。

> 最初に第二性徴が生じるのは男性は男性器の発達(男性器のタナー段階II)、女性は乳房の発達(Thelarche・乳房のタナー段階II前半→乳頭期[4][5])である。男女別の第二性徴の具体的発現順序などについては、思春期の項を参照のこと。毛深い男子は、陰毛の順番が早かったりする。

# Child Sexual Abuse

Isn't this Child Sexual Abuse? m9(▽▽)b

>Child sexual abuse

>Child sexual abuse (CSA), also called child molestation, is a form of child abuse in which an adult or older adolescent uses a child for sexual stimulation.[1][2] Forms of child sexual abuse include engaging in sexual activities with a child (whether by asking or pressuring, or by other means), indecent exposure (of the genitals, female nipples, etc.), child grooming, and child sexual exploitation,[3][4][5] such as using a child to produce child pornography.[1][6][7]

>Child sexual abuse can occur in a variety of settings, including home, school, or work (in places where child labor is common). Child marriage is one of the main forms of child sexual abuse; UNICEF has stated that child marriage "represents perhaps the most prevalent form of sexual abuse and exploitation of girls".[8] The effects of child sexual abuse can include depression,[9] post-traumatic stress disorder,[10] anxiety,[11] complex post-traumatic stress disorder,[12] propensity to further victimization in adulthood,[13] and physical injury to the child, among other problems.[14] Sexual abuse by a family member is a form of incest and can result in more serious and long-term psychological trauma, especially in the case of parental incest.[15]

>The global prevalence of child sexual abuse has been estimated at 19.7% for females and 7.9% for males.[16] Most sexual abuse offenders are acquainted with their victims; approximately 30% are relatives of the child, most often brothers, fathers, uncles, or cousins;[17] around 60% are other acquaintances, such as "friends" of the family, babysitters, or neighbors; strangers are the offenders in approximately 10% of child sexual abuse cases.[18] Most child sexual abuse is committed by men; studies on female child molesters show that women commit 14% to 40% of offenses reported against boys and 6% of offenses reported against girls.[18][19][20]

>The word pedophile is commonly applied indiscriminately to anyone who sexually abuses a child,[21] but child sexual offenders are not pedophiles unless they have a strong sexual interest in prepubescent children.[22][23] Under the law, child sexual abuse is often used as an umbrella term describing criminal and civil offenses in which an adult engages in sexual activity with a minor or exploits a minor for the purpose of sexual gratification.[7][24] The American Psychological Association states that "children cannot consent to sexual activity with adults", and condemns any such action by an adult: "An adult who engages in sexual activity with a child is performing a criminal and immoral act which never can be considered normal or socially acceptable behavior." >Cottaging

>Cottaging is a gay slang term, originating from the United Kingdom, referring to anonymous sex between men in a public lavatory (a "cottage",[1] "tea-room"[2]),[3] or cruising for sexual partners with the intention of having sex elsewhere.[4][5] The term has its roots in self-contained English toilet blocks resembling small cottages in their appearance; in the English cant language of Polari this became a double entendre by gay men referring to sexual encounters.[6] See also gay beat in Australian English.

(omit)

>Cottages as meeting places

>Before the gay liberation movement, many, if not most, gay and bisexual men at the time were closeted and there were almost no public gay social groups for those under legal drinking age.[16] As such, cottages were among the few places where men too young to get into gay bars could meet others whom they knew to be gay.[17]

(omit)

>Legal status

>Sexual acts in public lavatories are outlawed by many jurisdictions. It is likely that the element of risk involved in cottaging makes it an attractive activity to some.[21][22]
